

Affordable Child Care for Families

Federal Tax Incentives

December 2021

Federal Tax Incentives to Promote Affordability for Families:

Child and Dependent Care Tax Credit (CDCTC):

The Dependent Care Tax Credit (DCTC) is an opportunity for families to take a tax credit for child care expenses related to dependent children under age 13 or expenses relating to caring for those individuals who are mentally or physically disabled (and who are claimed as a dependent).

The amount of eligible expenses are capped and only a percentage of the allowable expenses are used to calculate the credit. For example, the credit rate declines as income rises. Allowable child care expenses for a family with one child are limited to \$3,000 per year. Families with two children are allowed \$6,000 in expenses per year. Against the cap of allowable expenses is a percentage limitation that is applied against the cap, which declines as income rises.

Therefore, the maximum credit is \$1,050 for one child (35 percent of \$3,000 in expenses) and \$2,100 for two children (35 percent of \$6,000). The 35 percent credit rate is reduced, but not below 20 percent, by one percentage point for each \$2,000 of adjusted gross income above \$15,000. The credit rate for families with income over \$43,000 is 20 percent.

Temporarily, for 2021 only, the American Rescue Plan increased the value of the credit. Expenses for one child were increased to \$8,000 and expenses for two children were increased to \$16,000. The percentage of expenses that a family can take as a tax credit was temporarily increased to 50 percent. Therefore, for 2021, the maximum credit is \$4,000 for one child and \$8,000 for two children. The increased value of the credit expires after December 31, 2021.

IRS guidance for taxable year 2021 (related to the American Rescue Plan Act temporary 1 year increase) has not yet been published by the IRS. For more information, [a good summary](#) has been written by the Congressional Research Service.

The following table shows the declining percentage credit rates by income for child care expenses incurred in 2022 (and years prior to 2021).

Income Range	Credit Rate Percentage	Dollar Value for One Child
Below \$15,000	.35	\$1,050
\$17,000 - \$19,000	.33	\$990
\$23,000 - \$25,000	.30	\$900
\$27,000 - \$29,000	.28	\$840
\$33,000 - \$35,000	.25	\$750
\$43,000+	.20	\$600

To read more information about the DCTC, check out [IRS Form 2441](#) and related [IRS resources](#) that describe how to calculate the credit.

Employer Sponsored Dependent Care Assistance Plans for Child Care Expenses (DCAPs)

Under current federal tax law, employers can set up Dependent Care Assistance Plans, which are flexible spending accounts ([Section 129 of the Internal Revenue Code](#)). If employers choose to offer such plans, employees can set-aside up to \$5,000 in pre-tax salary for dependent care expenses. (The American Rescue plan temporarily increased the amount employees can set aside to \$10,500 for 2021 only).

Using pre-tax dollars means a tax savings to employees (potentially 20-40 percent of child care expenses depending upon the family's tax bracket and expenses incurred for child care) as well as a tax savings for employers (funds set aside through a flexible spending account reduce employer payroll – for example, these funds aren't subject to FICA or FUTA taxes).

For many employees with young children, they may already be paying for child care, so the option for a flexible spending account reimburses them at a tax savings for money that would be spent anyway.

How do flexible spending plans work? An employer establishes a written plan (required by the IRS) and distributes a summary of the plan to all employees (required by the Department of Labor).

Employees estimate how much they think they will spend on child care for the year. They can then choose to have up to \$5,000 of their salary per year set aside tax-free into a flexible spending account through regular paycheck deductions (or \$10,500 in 2021).

As child care expenses are incurred, employees can submit for reimbursement from their flexible spending account (FSA). Expenses related to dependent children under age 13 or related to dependents who are mentally or physically incapable of caring for themselves (and who the employee claims as a dependent) are eligible for reimbursement through FSAs.

Here's [a calculator](#) to help employees figure out tax savings by utilizing DCAP benefits. It's always a good idea to consult with a tax professional, but conceptually, there are savings to be realized through the tax code for employers who wish to assist their employees with child care affordability. You can read more about flexible spending accounts through Florida's [FSA web page](#).

Need help to prepare and file your federal income tax forms?

The Volunteer Income Tax Assistance (VITA) program offers free tax help to people who generally make \$55,000 or less, persons with disabilities and limited English speaking taxpayers who need assistance in preparing their own tax returns. IRS-certified volunteers provide free basic income tax return preparation with electronic filing to qualified individuals.
